

Anticancer Drug Development: Important Areas & New Perspectives

Collection Editor: Da-Yong Lu

Description

Drug therapeutics plays a key role in cancer treatments and symptoms alleviation. However, the fastest progresses in cancer treatments and drug developments result in a great deal of developmental attritions. A lot of efforts must be made for drug developing improvements of both efficacy and categories. This book series provides latest scientific advances and new perspectives in this very scope of anticancer drug developments.

About the Editor

Da-Yong Lu, born in Shanghai. Graduated from Shanghai Institute of Materia Medica, Chinese Academy of Sciences and Shanghai Medical University; He was the first author of more than 100 original scientific articles published in international journals and three books on cancer, suicide and HIV therapeutics.

Submission Requirements

All chapters submitted should conform to the grammar and formatting guidelines provided by Cambridge Scholars Publishing, which can be viewed here: <https://www.cambridgescholars.com/pages/forms-guidelines>;

Unless agreed with the Editor prior to submission, referencing should be in Chicago;

Any work submitted for publication should be free of copyright restrictions and a statement should be submitted in support of this;

Contributions should be scholarly rather than anecdotal or unverifiable;

Contributions must be wholly in English, excluding footnotes, appendices and short extracts for translation;

While we will perform pre-press evaluations on the collection, we do not provide full proofreading services, so we ask that works are submitted to us in their final, 'ready-to-go' form.
