

# Bioactive Molecules from Microalgae

**Collection Editors: Eduardo Jacob-Lopes, Leila Queiroz Zepka, and Tatiele Casagrande do Nascimento**

---

## Description

The microalgae constitute a vast universe of molecules biologically active and with commercial importance. This book will present the most up-to-date research on these compounds. This will be a solid resource that brings together multidisciplinary research, development, and innovation for a wide study of microalgae biologically active molecules.

## About the Editors

Prof. Eduardo Jacob-Lopes is currently associate professor at the Department of Food Technology and Science, Federal University of Santa Maria. He has more than 15 years of teaching and research experience. He is a technical and scientific consultant of several companies, agencies, and scientific journals. He has 466 publications /communications, which include 11 books, 42 book chapters, 94 original research papers, 364 research communications in international and national conferences, and has registered 15 patents. His research interest includes biotechnology and bioengineering with emphasis on microalgal biotechnology.

Prof. Leila Queiroz Zepka is currently an associate professor at the department of food technology and science, Federal University of Santa Maria. She has a masters in food engineering from Federal University of Rio Grande and a doctorate in food science from State University of Campinas. She has more than 15 years of teaching and research experience. She is a technical and scientific consultant of several companies, agencies and scientific journals. She has 440 publications/communications which include 11 books, 42 book chapters, 78 original research papers, 250 research communications in international and national conferences and has registered 10 patents. Her research interest includes microalgal biotechnology with emphasis on biomolecules and natural pigments.

Tatiele Casagrande do Nascimento is currently a researcher at the department of food technology and science, Federal University of Santa Maria. She has a masters and doctorate in food science and technology from Federal University of Santa Maria. Her research interest includes microalgal biocompounds with emphasis on bioactive molecules and health.

## Submission Requirements

All chapters submitted should conform to the grammar and formatting guidelines provided by Cambridge Scholars Publishing, which can be viewed here: <https://www.cambridgescholars.com/pages/forms-guidelines>;

Unless agreed with the Editor prior to submission, referencing should be in Chicago;

Any work submitted for publication should be free of copyright restrictions and a statement should be submitted in support of this;

Contributions should be scholarly rather than anecdotal or unverifiable;

Contributions must be wholly in English, excluding footnotes, appendices and short extracts for translation;

While we will perform pre-press evaluations on the collection, we do not provide full proofreading services, so we ask that works are submitted to us in their final, 'ready-to-go' form.

You can view open projects at the link below:
