

Biotechnologies in Medicinal Plants

Collection Editors: Goetz Hensel and Pouneh Pouramini

Description

The book will summarize approaches for using biotechnological methods as tissue culture and/or genetic transformation to improve or manipulate pathways for the production of biologically active pharmaceuticals, to enhance extractability of medicinal plant ingredients or production of recombinant protein in plants.

About the Editors

Pouneh Pouramini holds a MSc in Medicinal and Aromatic plants and started her PhD at IPK Gatersleben, Germany.

Goetz Hensel is Senior Scientist at IPK and expert in genetic transformation of plants. Both published a number of articles, book chapters and books in the field of transgenic and medicinal plants.

Submission Requirements

All chapters submitted should conform to the grammar and formatting guidelines provided by Cambridge Scholars Publishing, which can be viewed here: <https://www.cambridgescholars.com/pages/forms-guidelines>;

Unless agreed with the Editor prior to submission, referencing should be in Chicago;

Any work submitted for publication should be free of copyright restrictions and a statement should be submitted in support of this;

Contributions should be scholarly rather than anecdotal or unverifiable;

Contributions must be wholly in English, excluding footnotes, appendices and short extracts for translation;

While we will perform pre-press evaluations on the collection, we do not provide full proofreading services, so we ask that works are submitted to us in their final, 'ready-to-go' form.
