

Business Intelligence in Industry 4.0: Tools & Techniques

Collection Editor: P. Mary Jayanthi

Description

Industry 4.0 is the transition of digitization in manufacturing. Industry 4.0 refers to a new phase in the Industrial Revolution that focuses heavily on interconnectivity, automation, machine learning, and real-time data. Business Intelligence plays a major role in business operations and decision making with new innovative technology and techniques.

About the Editor

Dr. P. Mary Jeyanthi is working as a faculty at the Institute of Management Technology, Nagpur, Maharashtra. She had one decade of industry experience in HDFC Bank Ltd, Business Intelligence Unit, Chennai, Tamil Nadu. She had the hands full of expertise in Business Intelligence and forecasting analytics.

Submission Requirements

All chapters submitted should conform to the grammar and formatting guidelines provided by Cambridge Scholars Publishing, which can be viewed here: <https://www.cambridgescholars.com/pages/forms-guidelines>;

Unless agreed with the Editor prior to submission, referencing should be in Chicago;

Any work submitted for publication should be free of copyright restrictions and a statement should be submitted in support of this;

Contributions should be scholarly rather than anecdotal or unverifiable;

Contributions must be wholly in English, excluding footnotes, appendices and short extracts for translation;

While we will perform pre-press evaluations on the collection, we do not provide full proofreading services, so we ask that works are submitted to us in their final, 'ready-to-go' form.
