

# Grapes and Wine-Preventive Valuable Nutritional Tools

**Collection Editor: Veronica Sanda Chedea**

---

## Description

The huge volume of research on grapes and wine testify for their importance in human nutrition as means for health maintaining and disease prevention, due to their high content in bioactive compounds. The book aims to be a discussion forum for the newest research results in the framework of the above main idea.

## About the Editor

Dr Veronica Sanda Chedea has an expertise in the field of natural bioactive polyphenolic compounds. She has been published more than 50 research papers and book chapters in the field and has edited the book, Procyanidins characterisation, antioxidant properties and health benefits. Dr Chedea was the director or member in the research team of more than 25 national and international projects.

## Submission Requirements

All chapters submitted should conform to the grammar and formatting guidelines provided by Cambridge Scholars Publishing, which can be viewed here: <https://www.cambridgescholars.com/pages/forms-guidelines>;

Unless agreed with the Editor prior to submission, referencing should be in Chicago;

Any work submitted for publication should be free of copyright restrictions and a statement should be submitted in support of this;

Contributions should be scholarly rather than anecdotal or unverifiable;

Contributions must be wholly in English, excluding footnotes, appendices and short extracts for translation;

While we will perform pre-press evaluations on the collection, we do not provide full proofreading services, so we ask that works are submitted to us in their final, 'ready-to-go' form.
