

Rational Use of the Results of Mathematical Modelling

Collection Editor: Yuri Menshikov

Description

The book is devoted to the rational use of methods of mathematical modeling for solving practical problems. First of all, this concerns the problems of sound prediction and control of the behavior of physical processes by mathematical methods.

About the Editor

Yu. L. Menshikov was educated at Kharkov and Dnepropetrovsk Universities (1966-1970). In 1978, he defended his thesis. He has about 400 scientific publications including two book chapters, the book Identification of Models of External Loads in 2009 and his most important article in the European Journal of Mathematical Sciences (2013).

Submission Requirements

All chapters submitted should conform to the grammar and formatting guidelines provided by Cambridge Scholars Publishing, which can be viewed here: <https://www.cambridgescholars.com/pages/forms-guidelines>;

Unless agreed with the Editor prior to submission, referencing should be in Chicago;

Any work submitted for publication should be free of copyright restrictions and a statement should be submitted in support of this;

Contributions should be scholarly rather than anecdotal or unverifiable;

Contributions must be wholly in English, excluding footnotes, appendices and short extracts for translation;

While we will perform pre-press evaluations on the collection, we do not provide full proofreading services, so we ask that works are submitted to us in their final, 'ready-to-go' form.
