

Resilience Engineering

Collection Editor: Ehsan Noroozinejad

Description

Resilience engineering is a paradigm for safety management that focuses on how to help people cope with complexity under pressure to achieve success. In engineering, the interest in resilience is to ensure stability and guarantee functionality in engineering systems that are confronted by disturbances, which are often associated with low chances of failures or, in the case of failure, quick recovery to a functional state.

About the Editor

Dr. Ehsan Noroozinejad is the Chief Editor of the International Journal of Earthquake and Impact Engineering, the Associate Editor of the ASCE Practice Periodical on Structural Design and Construction, the Associate Editor of the IET Journal of Engineering, the Associate Editor of Frontiers in Built Environment: Earthquake Engineering Section, and the Trial Engineering Editor of ASCE Natural Hazards Review.

Submission Requirements

All chapters submitted should conform to the grammar and formatting guidelines provided by Cambridge Scholars Publishing, which can be viewed here: <https://www.cambridgescholars.com/pages/forms-guidelines>;

Unless agreed with the Editor prior to submission, referencing should be in Chicago;

Any work submitted for publication should be free of copyright restrictions and a statement should be submitted in support of this;

Contributions should be scholarly rather than anecdotal or unverifiable;

Contributions must be wholly in English, excluding footnotes, appendices and short extracts for translation;

While we will perform pre-press evaluations on the collection, we do not provide full proofreading services, so we ask that works are submitted to us in their final, 'ready-to-go' form.

You can view open projects at the link below:
