

The Role of Distinctive Features of Phonemes in Language

Collection Editor: Renáta Gregová

Description

The collection brings together contributions confirming the importance of distinctive features of phonemes in linguistic analysis, but also in the study of speech production and/or perception (including articulation errors and inaccuracies), in the process of acquiring language by children, as well as in second language acquisition.

About the Editor

Renáta Gregová is associate professor at Pavol Jozef Šafárik University, Košice, Slovakia. In 2005, she received her PhD at general linguistics from the Slovak Academy of Sciences. In 2015, she was awarded the habilitation degree (doc.). Her research activities concentrate on (comparative) phonetics, phonology, morphophonology, but also language universals and typology.

Submission Requirements

All chapters submitted should conform to the grammar and formatting guidelines provided by Cambridge Scholars Publishing, which can be viewed here: <https://www.cambridgescholars.com/pages/forms-guidelines>;

Unless agreed with the Editor prior to submission, referencing should be in Chicago;

Any work submitted for publication should be free of copyright restrictions and a statement should be submitted in support of this;

Contributions should be scholarly rather than anecdotal or unverifiable;

Contributions must be wholly in English, excluding footnotes, appendices and short extracts for translation;

While we will perform pre-press evaluations on the collection, we do not provide full proofreading services, so we ask that works are submitted to us in their final, 'ready-to-go' form.
